

The Kybalion The Three Initiates

First published in 1908 by the mysterious “Three Initiates,” *The Kybalion* presents a modern exposition of Hermetic philosophy. Drawing on esoteric traditions attributed to Hermes Trismegistus, the text outlines seven universal principles—Mentalism, Correspondence, Vibration, Polarity, Rhythm, Cause and Effect, and Gender.

Blending metaphysical insight with practical spiritual instruction, *The Kybalion* has influenced generations of readers in occult, New Thought, and self-development traditions. Its aphoristic style and systematic presentation make complex mystical ideas accessible and memorable.

A compact yet enduring guide to esoteric philosophy.
